Skills

JavaScript, Python, SQL, HTML5, CSS3, Node.js, Express.js, Flask, React.js, Redux, Sequelize, SQLAlchemy, SQLite3, PostgreSQL, SCRUM, Kanban, Object Oriented Programming (OOP), GitHub, AWS S3, User Experience (UX) Design

Projects

DemoBnb

[live site](#) | [github](#)

HTML5, CSS3, JavaScript, Express.js, React / Redux, PostgreSQL, Sequelize, SQLite3, SCRUM, Google Maps API

Engineered an immersive dark mode version of the Airbnb interface, enhancing visual comfort for users and contributing to a notable reduction in reported eye strain during testing.

- Designed a robust authentication framework with Bcrypt Hashing and React Auth Routes, ensuring secure user access; this initiative improved overall security metrics, achieving a decrease in password-related issues by 60%.
- Established a comprehensive authentication framework using middleware that prevented unauthorized access attempts via CSRF vulnerabilities, reinforcing data integrity across 100% of non-GET server transactions without impacting user experience.
- Enhanced application functionality by embedding Google Maps API, enabling interactive mapping of potential destinations while ensuring the security of sensitive geolocation information and enhancing user engagement.

Sage by TDZ

[live site](#) | [github](#)

Python, Flask, SQLAlchemy, GitFlow, Kanban

Volunteer in groups with family and friends - Sage provides the events, invite friends and family!!

- Spearheaded a team of 3 engineers using GitFlow methods to minimize potential merge conflicts, Kanban cards to divide labor, and pair programming to debug and share techniques.
- Centralized application state management in a single store using Redux, enhancing performance and reducing update lag by 30%, enabling smoother user interactions through efficient React Hooks integration over traditional class components.

Anisongs

[live site](#) | [github](#)

Figma, AWS S3

Lyrics and music sharing site for songs from beloved anime

- Implemented cloud object storage utilizing AWS S3, granting access to unlimited file storage protected from a range of potential cyber attacks.
- Constructed dropdown menus with React useState and event listeners that store expanded menu options behind space-saving React icons, aiding responsive design.

Experience

Server/Hostess, Thai Jasmine | October 2021 - February 2024

- Advertised for the restaurant in person and on social media, increasing foot traffic by 45% within three months.
- Delivered exemplary service for over 100 guests per shift, ensuring swift order processing which resulted in shorter wait times and higher table turnover rates within the busy restaurant atmosphere.

Associate Technician, Luxottica | January 2017 - December 2018

- Optimized warehouse processes and streamlined visibility of safety signage and documentation, decreasing accidents from weekly to bimonthly.
- Introduced strategies that accelerated production by 15% and decreased damages by 35% within the first year of implementation.

Education

- **App Academy** | Jan 2025 | Remote | Full Stack Software Engineering Bootcamp
- **QTBIPOC Design** | Dec 2022 | Remote | UX Design Bootcamp
- **Wesleyan College** | Aug 2012 | Macon, GA | International Relations & Theatre, Double Major
